INNOVATION
DESIGNED
FOR REFINING

A PRECIOUS METALS
RECYCLING COMPANY

PRECIOUS METALS RECYCLING & REFINING

Founded in 1968, Metallix is a leader and innovator in the precious metals recycling industry. Metallix purchases, recycles, and refines materials containing gold, silver, platinum, palladium, rhodium and iridium.

The advanced processing technology developed by Metallix significantly increases our recycling capabilities, providing an effective and expedient processing route for a number of precious metals.

The Metallix team has a wealth of experience serving a variety of industries that use precious metals.

METALLIX SERVE SOME OF THE FOLLOWING INDUSTRIES:

- Aircraft / Aerospace
- Catalytic Converters
- Connectors / Stamping
- Electroplating
- Glass & Mirror
- Jewelry
- Medical
- Microelectronics
- Nitric Acid
- Pharma / Specialty Chemicals
- Semiconductor
- Solar

PRECIOUS METALS WE BUY

79 Au Gold 196.967	47 Ag Silver 107.868	78 Pt Platinum 195.085	46 Pd Palladium 106.42	45 Rh Rhodium 102.906	77 Ir Iridium 192.22

PRECIOUS METALS RECYCLING & REFINING

Founded in 1968, Metallix is a leader and innovator in the precious metals recycling industry. Metallix purchases, recycles, and refines materials containing gold, silver, platinum, palladium, rhodium and iridium.

The advanced processing technology developed by Metallix significantly increases our recycling capabilities, providing an effective and expedient processing route for a number of precious metals.

The Metallix team has a wealth of experience serving a variety of industries that use precious metals.

The Metallix precious metals recycling facility is located on a 27-acre site in Greenville, North Carolina. This 140,000 square-foot processing plant has the industry's most advanced technology and methodology to maximize efficiency and value.

- ISO 9001:2015 certified quality management system at the Greenville, NC, processing facility
- ISO 14001:2015 certified environmental system at the Greenville, NC, processing facility
- ISO 45001:2018 certified Occupational Health and Safety management system at the Greenville, NC, processing facility
- ITAR Compliance
- Conflict Minerals Compliance 3T/G
- AML Regulated (Anti Money Laundering)
- C-TPAT Certification
- Analytical Lab
- 24/7 Secure Access Site
- Bank Wire or Metal Transfer
- Global Logistics
- Certificate of Recycling issued

MELT

Our melting furnaces range in capacity from just a few troy ounces up to 2,000 pounds to accommodate and process material lots varying in type, size and precious metals content.

THERMAL REDUCTION

Metallix's APR³ is the only thermal reduction furnace of its kind in our industry and was specifically designed to meet the challenge of improving the processing of valuable "Burnable" precious metal bearing materials.

MECHANICAL REDUCTION

Ball mills, sifters and blenders are used to convert the precious metal bearing materials to a homogeneous particle size to help evaluate the precious metal content.

WET CHEMICAL

Our wet chemical department has the capability to recover precious metals by electrolysis, dissolution, separation, and precipitation.

ANALYTICAL LABORATORY

Samples from each treated and processed lot are tested for their precious metals type and content. We can detect gold, silver, platinum, palladium, rhodium and iridium, as well as other elements, through methods that include fire assay, chemical analysis, X-ray, titration, gravimetric and ICP.
